McQuinn hCG Diet Prescription Agreement Form

Because your health can vary over time, McQuinn hCG Diet only honors prescriptions for three (3) months after the prescription is written. After three (3) months another consultation with our doctor is required.

I have read and understand the aforementioned statement.

Signature _____ Date _____

HCG is given by prescription only. If I discontinue the McQuinn hCG Diet program for any reason, I understand that my initial prescription is valid for three (3) months from the time the prescription is written. If there is no discontinuation of the program, the initial prescription is also only valid for three (3) months.

I have read and understand the aforementioned statement.

Signature _____ Date _____

Shot instruction sheet and patient acknowledgement

hCG should be taken 1st thing in the morning before any other food is ingested. Injections should be self administered into the subcutaneous fat around the abdomen. You may “pinch an inch” to avoid injecting too deeply into muscle (see picture).

1. A brand new diabetic syringe must be used for EVERY injection.
2. Be sure to use the included alcohol swab to clean the area you intend to inject as well as the top rubber seal of the hCG bottle.
3. Draw back to the correct number on the needle (based on your prescription) and inject the air into the bottle, then slowly draw back to that number while keeping the tip of the needle submerged in the hCG solution.
4. Quickly insert the needle while pinching the alcohol swabbed area (picture above), and inject.
5. Needles MUST be collected in a safe place and properly disposed of at your local needle drop, fire station or police station.

Note: When not in use, the hCG solution must be refrigerated at all times.

By signing this form, (print name here) _____ understands that any deviation from these directions may result in improper injection of the hCG fluid mixture. This may result in redness, swelling or bruising of the area. In certain rare cases a rash may occur. If the patient experiences any of these side effects they agree to notify the doctor immediately by calling 1-425-293-0107. They must also discontinue taking the hCG injection until they have received subsequent approval from their doctor. At this time, there are no known side effects of injecting small amounts of hCG subcutaneously. Neither McQuinn Naturopathic nor Dr. Mcquinn shall be held responsible should these or any other side effects occur from proper or improper administration of the subcutaneous hCG injections.
